Electro Dance Music. In our days, this genre is very popular. Songs of Alan some like a movie soundtrack. This is one of many reasons, why people love his music. Two of my favourite musicians is Hatsune Miku - Japanese singing hologramm. Her look is so adorable! Long hair and big blue eyes keep standing in heart every human, who hear her voice. She created by Crypton Future Media in 2007, in last day of the summer. She sings of voice Saki Fudisita with help of synthesiser voice program "Vocaloid". She can sing in Japanese, English, Spanish and many other languages. In 2017 - she begin learning Russian language. I keep love of music, and listen this with happy thoughts, cause just music help me being positive.
